

State of New Hampshire Acute Respiratory Illness* (ARI) Activity by Public Health Region

2012 MMWR
Week 4
(January 22 - January 28)

Data is derived from New Hampshire AHEDD surveillance reports based on chief complaint text of emergency department encounters from 26 hospitals statewide for the time frame indicated.

*Acute Respiratory Illness or ARI includes chief complaint text values of either fever/cough, or fever/sore throat, or flu (includes flu, influenza, flu like symptoms, etc.), or respiratory infection (includes URI, LRI), or bronchitis, or viral infection, or pneumonia, or pharyngitis, or sinusitis, or otitis media.
